

Jonathan Unisa Henderson, NV 89044 | (908) 316-4522 | jonathanunisa@gmail.com | j-unisa.github.io

OBJECTIVE

IT professional with 16+ years of experience transitioning into **Software & Web Development**. Leveraging rigorous full-stack training (JavaScript, Python, Ruby) and systems background to build efficient, scalable web solutions.

TECHNICAL SKILLS

- **Languages & Web:** JavaScript (ES6+), Python, Ruby, SQL (SQLite), C, HTML5, CSS3, Flask, Jinja2.
- **Tools & Systems:** Git/GitHub, Linux CLI, VS Code, REST APIs, Azure AD, Active Directory.

PROJECTS

Persistent To-Do List | *Flask, JavaScript (Fetch API), SQLite*

- **Async CRUD:** Engineered a task manager supporting Create, Read, Delete with instant DB sync.
- **UI/UX:** Implemented **Fetch API** to handle task deletion asynchronously, updating the DOM without page reloads.
- **Secure Data:** Implemented **SQL injection prevention** using parameterized queries for all database interactions.

JavaScript Calculator | *Vanilla JavaScript, CSS3*

- **State Management:** Built a state machine to track operands/operators, enabling complex chained calculations.
- **Events:** Implemented dual event listeners (Click/Keydown) to support both mouse and keyboard navigation.
- **Error Handling:** Manually handled edge cases like division by zero and floating-point precision without `eval()`.
- **Responsive UI:** Designed a layout using **Flexbox** that adapts seamlessly to mobile and desktop screens.

Interactive Quiz Application | *Flask, SQLite, Jinja2*

- **Full Stack Logic:** Built a Flask app with dynamic routing; server-side randomization via Python's `shuffle` module.
- **Database Design:** Structured an **SQLite** database to store questions and track user scores across sessions.

PROFESSIONAL EXPERIENCE

Freelance Technical Consultant | *Remote* | 2025 - Present

- **AI Code Evaluation:** Evaluate AI-generated code in **Python** and **JavaScript** for logic, syntax and efficiency; correct technical inaccuracies to improve training data for LLMs.

Device and Apps Manager | *Dover Public Schools, Dover, NJ* | Oct 2020 - Jun 2025

- **Scripting & Automation:** Customized the district's ticketing system (IIQ) using **JavaScript/HTML/CSS** to improve UI/UX; wrote scripts to supplement MDM (Mosyle) policy deficiencies for software configuration.
- **Testing & Validation:** Executed testing and validation of software and OS updates prior to mass deployment.

PREVIOUS TECHNICAL EXPERIENCE

Hillside Public Schools (2019 - 20) | Bernards Township Schools (2012 - 18) | DRS Technologies (2008 - 12)

- *Summary:* 12+ years in technical support, network troubleshooting (Network+), and system administration.

EDUCATION & CERTIFICATIONS

The Odin Project: Full Stack Web Development Curriculum (Ruby/Rails, JavaScript, HTML/CSS) | *In Progress*

Harvard University (CS50): Intro to Computer Science (C, Python, SQL) | 2022

Stanford University (Code in Place): Python Programming Methodology | 2021

Certifications: CompTIA Network+, CompTIA Security+, Google Certified Associate (G Suite Admin)
